Detailed Office Action

1. Receipt of Applicants' election filed on 06 February 2004, electing the invention of Group II is acknowledged.
2. Applicant is thanked for faxing paper copies of the sequence listing and the newest set of claims.

Re-Restriction:

3. In the reply filed on 06 February 2004, Applicants elected the invention of Group II, (28, 29, 36 and 37), without traverse.

However, upon further consideration, the examiner has decided to re-restrict further among the polypeptide sequences set forth in SEQ ID NOs:7 to 12 recited in claim 29, because these polypeptide sequences are independent and distinct inventions. Each of the polypeptide sequences is independent and distinct because no common core structural or functional properties are shared. The amino acid sequences set forth in SEQ ID NOs:7 to SEQ ID NO:12, vary in length and appear to possess characteristic differences in structure and function. Absent evidence to the contrary, each such amino acid sequence is presumed to represent an independent and distinct invention, this Authority therefore considers that the several polypeptide sequences do not share a special technical feature within the meaning of PCT Rule 13.2 and thus do not relate to a single general inventive concept within the meaning of PCT Rule 13.1.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1647

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
